

Instructions for using the GGAC Heavy Duty Toilet Stool.

1. The Carrying Bag would normally contain the Frame, the Toilet seat, a cover which can also be used as a camping stool plus Biodegradable Bags.
2. Open the Frame to about $\frac{3}{4}$ of the full width.
3. Attach the washable Vinyl Toilet Seat (or the camping Stool cover) over the four corners of the Frame.
4. Open the Frame to the full extent and ensure that the lower bar is clipped securely into the locked position.
5. If using a Biodegradable Bag insert this through the top , cover the Vinyl seat cover and pull it over the four corners so that it is secure.
6. If the Bag is being used more than once before removing it from the Frame, add whatever comes to hand e.g grass, leaves, some soil or shredded paper. You can use a limited quantity of Aquablue or similar, obtainable from most camping shops.
7. Dispose of the used Bags sensibly. Leave no Litter.
